Quick FAQs

When a guest asks about Blackbird, what do I say?

"We accept Blackbird, an app that rewards you with points (\$FLY) for dining out.

You can pay in the app and use your points like cash here and at other great restaurants in the Blackbird network."

The guest doesn't appear under "Open Tabs"

First, make sure they've added a valid credit/debit card to their account.

Then, ask them to check in again and tap "Yes" when prompted to pay with Blackbird.

The guest wants to pay with \$FLY

Make sure they have toggled on

 **Pay with \$FLY** from their check settings page.

If they accidentally charged their card instead, have them contact support@blackbird.xyz for help.

The table wants to split a check

If everyone is paying with Blackbird, have them tap **Split the Check** — this creates one combined check on the Terminal.

If only some are using Blackbird, split the check in your POS. First, close out the non-Blackbird guests, then close out the Blackbird guests.

You are logged out of the Blackbird Terminal

Your login credentials are auto-saved. To access:

- Tap **Log In**
- Tap into the **Email address** field
- Tap **Sign In**

You don't know your PIN code

It defaults to the last 4 digits of the phone number linked to your Blackbird account.

If you don't have a Blackbird account, you won't have a PIN — use the manager PIN instead.

Your restaurant has an auto-gratuity policy

Auto-gratuity is already added to the check. Remind guests to set their in-app tip to 0% if they don't want to add an additional tip.

How to pre-authorize a charge

This feature lets you place a temporary hold on a guest's payment method for the amount of their order mid-service. This ensures the card is valid and funds are available, giving you confidence the payment will clear when the check is closed.

On the Blackbird Terminal

1. Tap the the guest tab
2. Tap **Pre-Authorize**
3. Enter the amount, usually equal to the amount of the guest's order thus far
4. Blackbird attempts to pre-authorize the payment
5. If pre-authorization fails, **collect another form of payment outside of Blackbird Pay**
 - a. *Blackbird will not honor any payment after a failed pre-authorization*
